

Complete the RabbitMQ tutorial

1. Use Docker to run a local RabbitMQ server, and then go through the tutorial step 1 – 6 in either JavaScript or C# (or both) here:

<https://www.rabbitmq.com/tutorials/tutorial-one-javascript.html>

2. If Docker isn't on your computer you may use the hosted service instead:

www.cloudamqp.com/plans.html

And follow this tutorial: <https://www.cloudamqp.com/docs/nodejs.html>
